

House Garden

Frankfurt
Completion 2011

Client: privat
Area: appr. 100 m²
Service Phases: Lph 3
Duration: 2011
In collaboration with: Marie-Theres
Deutsch Architekten
BDA, Frankfurt a.M.

The project comprised of enlarging the small garden in the backyard of an apartment building with the introduction of a green wall. Stainless steel balcony boxes adorned the white-plastered brick wall with vibrant perennials. This implementation added both an aesthetic and beneficial effect to the backyard.

Moreover, a long water element was installed on the base of the garden, which allowed viewers on the ground level to experience a rushing and relaxing state simultaneously.
