

Park Grounds „Large Meadow“

Arnsberg - Hüsten
Completion 2011

Client: Technische Dienste Arnsberg
Grünflächenmanagement
Area: appr. 1,5 ha
Cost: 1.200.000 Euro
Service Phases: Lph 1 - 8
Duration: 2007 - 2011

The guiding objective of the landscape strategy is to design the park as a new and lively point in the city map, which would combine different uses, functionalities, peripheral areas, and would function as an entry point. The existing sub-areas of the leisure landscape are to be combined into a comprehensive ensemble, which can also be experienced as a unit. It is important to give the park and leisure pool a new, unique address that would highlight them.

For this purpose, the necessary infrastructure facilities, bus station, NASS parking lot and event space are bundled on a central element. This block forms an attractive entry point and starting point for the facilities of the school, leisure pool and park.
