Area: 224.000 sqm
Service Phases: Lph 1-5
Duration: 2006 - 2011
In collaboration with: Arge mit Rainer Schmidt Landschaftsarchitekten, München, RMJM, HongKong

The landscape design is based on retaining and enhancing the natural character of the site through sympathetic and complimentary design. The existing site has many unique features that have been drawn upon as the basic elements of the landscape design. These include the natural topography of hills and valleys, the presence of water and existing vegetation. The design response has been to maintain a natural setting that works with and highlights the local sense of place rather than to impose a new character upon the site. Thus, the design strategy develops the existing qualities of the site.
