Cost: appr. 180.000 Euro
Area: appr. 480 m²
Service Phases: Lph 1-8
Duration: 2010-2012

This garden plays with different thematic concepts while using a contemporary approach.

Specific themes were integrated in the spheres of intimacy created for the various functional spaces.

For example, right by the upper terrace, the structures of a Japanese garden were reinterpreted with modern materials. On a lower level, in a private area of the garden, there is a sauna along with the accompanying sauna garden.

The "vertical garden" found in the outdoor kitchen terrace area creates a large volume of greenery without taking up much space. It creates a special atmosphere, but not just for special occasions.
