Cost: 1.700.000 Euro
Area: 25.000 sqm
Service Phases: Lph 1-8
Duration: 2002-2007
In collaboration with: Struhk Architekten,

The clear urban planning principles applied for the construction of the Federal Institute for Plant Breeding Research (BAZ) were also maintained in the design of the outdoor facilities, allowing the creation of a cohesive ensemble. The main theme for the overall design concept of the grounds is that of an estate, which is recognizable for example in the choice of crops, such as vines and fruit trees, and which also inspired the design of the water areas supplied by rainwater, which remind of fire protection ponds found in rural settings.
