

Residential building within a Green Center

Essen
Completion 2015

Client: Versorgungswerk der Architektenkammer NRW
 Cost: 558.714 Euro
 Area: 4.800 sqm
 Service Phases: Lph 1 - 8
 Duration: 2012 - 2015
 In collaboration with: pbs
 architekten Gerlach Krings
 Böhning, Aachen

The project incorporates the design of a unifying green center encirculated by newly-built six buildings. Thus, a central square was designed as a multifunctional space for informal gatherings, resting space and as the entry point into the residential complex.

The design is further framed with the presence of three characteristic trees. Adjacent to the square, resides the communal courtyards. These are subdivided into a play or picnic area, as well as open lawn areas. This inclusive design hence caters for the diverse age groups and allows an overlap of respective recreation spaces with one another.
