

Campeon - Infineon Headquarter Munich

Neubiberg near Munich
Completion 2005

Client: MoTo Objekt
Campeon
Cost: 19.300.000 Euro
Area: 620.000 m²
Service Phases: Lph 1-8
Duration: 2001-2005
In collaboration with: in
ARGE mit Rainer Schmidt
Landschaftsarchitekten,
Hochbau: TEC architects und
Maier + Neuberger Architekten

The new campus for Infineon's 7000 employees is based on the concept of combining structural clarity with the human scale of a campus setting. The concept was awarded with the 1st prize and realized in 2005. The town planning structure abstains deliberately from a superstructure type of office building, but focuses on the universal human scale of modularity:

house, square, street, alley, court and park. A water ring with natural qualities surrounds the city of offices. Apart from its aesthetic qualities it works as a climatic buffer to reduce peak temperatures. A large-scale reed- and sand filtration system keeps its water at top-level quality. An existing 20 acre park outside the pond serves as a leisure park for both neighboring residents and Infineon workers.
