

## SMA Solar Technology AG Geb. 60 - 65 Dresdener Straße

Kassel, Niestetal  
Completion 2012

Client: SMA Solar Technology AG  
 Cost: appr. 1.400.000 Euro  
 Area: 15.000 m<sup>2</sup>  
 Service Phases: Lph 1-3  
 Duration: 2010 - 2012  
 In collaboration with: HHS Planer +  
 Architekten AG, Kassel

The project incorporates the open space design along the Dresdener Straße, which grasps the buildings 60-65. Around the renovated old building SMA 62, a new landscape reception area is being built for the new principle building SMA 61. The designed space is divided into a spacious plaza with a seating island, a bypass, and a garden at the refurbished old building. Twin buildings 64/65 share a courtyard that splits into a reception and an outside seating area for the cafeteria. A hedge labyrinth separates the areas and simultaneously offers opportunities for retreat. The outdoor concept adopts identifiable elements that underline the corporate identity, recurrent at all SMA locations.
