

REWE Green Building Wiesbaden-Erbenheim Completion 2021

Client: REWE Markt GmbH
 Cost: 7,5 million € total
 1,6 million € outdoor facilities
 Area: 7.416 sqm
 Service Phases: Lph 1 - 9
 Duration: 2018 - vsl. 2021
 In collaboration with:
 acme, London
 Krebs+Kiefer, ZWP, e2, Knippers Helbig, ECF

In collaboration with the London-based architectural firm 'acme', a new supermarket for REWE Markt GmbH has been built. Its unique and sustainable design is intended to serve as a model for other stores. The supermarket, made of timber and glass, has a unique roof with an aquaponic farm. This shopping-centre-of-the-future both sells and produces resource-saving food products. The supermarket's outdoor facilities underscore this innovative concept. A focal point is the green landscaped area, planted with native perennials and urban-climate-resistant hop hornbeam trees, with parking spaces arranged in a radial pattern.

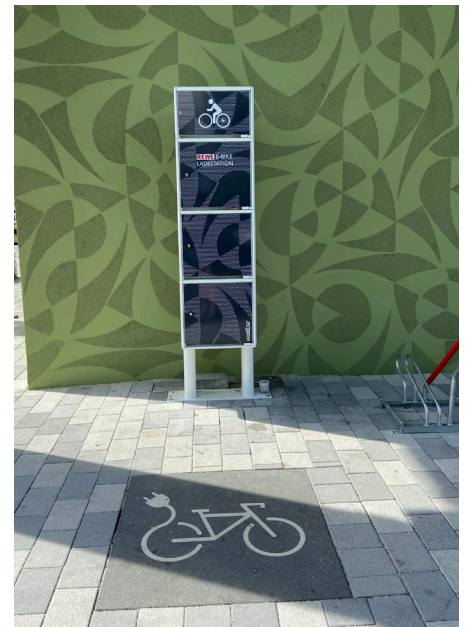

Minimal surface sealing and the establishment of green areas combine to create natural oases that offer climate protection for both people and animals.

Grüne Oasen 3

Weniger ist mehr.

Durch den Einsatz von **Rasenfugenpflaster** und der Anlegung von **Grünflächen** können wir die Flächenversiegelung unserer Außenanlagen deutlich senken.

Das sieht nicht nur schöner aus – so kann verdunstendes Wasser zur **Kühlung** der Luft beitragen. Apropos Wasser: Wir sammeln **Regenwasser** in einer Zisterne und benutzen es im Markt und auf unserer **Dachfarm im 1. OG!**
