

## Climate-friendly forum

Salzgitter  
Completion 2023

Client: Stadt Salzgitter  
Cost: ca. 589.850 Euro  
Area: 2000 qm Bad,  
600 qm Lebensstedt  
Service phases: Lph 1 - 9  
Duration: 2022 - 2023

The "Small Climate-Friendly Forum" is to be created in the centers of Salzgitter-Bad and Salzgitter-Lebenstedt, replacing mature trees with new climate-resilient trees, using fogging technology to lower the ambient temperature and drinking fountains for refreshment. This will create small, green oases to linger in, making the inner cities of Lebenstedt and Bad more attractive and ensuring a better climate balance in the centers.

The measures pursue these objectives:

- Climate protection through unsealing and planting resilient tree species
- Improvement of the urban climate
- Improving the quality of stay
- Creation of meeting places
